

SHUBHAM SAINI

Senior Software Engineer — Frontend (React.js)

shubhi1428@gmail.com | 9736634945 | Bangalore, India | linkedin.com/in/shubh1502

PROFILE

Senior Frontend Engineer with 5+ years of experience building scalable enterprise web applications using **React.js**, **JavaScript**, and **TypeScript**. Skilled in modernizing legacy applications, developing reusable UI components, optimizing frontend performance, and delivering accessible (**WCAG 2.1**) user experiences across Enterprise SaaS and BFSI platforms. Uses AI-assisted development tools (**GitHub Copilot**, **Cursor**, **Claude Code**) to accelerate delivery while maintaining code quality, maintainability, and scalability.

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Frontend Focused

05/2025 – Present

SAP SuccessFactors (Contract)

- Engineered enterprise recruitment workflows for SAP SuccessFactors Recruiting, delivering scalable frontend solutions supporting end-to-end talent acquisition for global organizations.
- Designed business-critical modules using **React 18**, **JavaScript**, and **SAP UI5 Web Components**, including Job Requisition, Candidate Tracking, Interview Scheduling, Job Posting, Application Lifecycle, and Offer Management, strengthening application scalability and accelerating legacy-to-React modernization initiatives.
- Modernized legacy JSP applications by establishing a reusable React component architecture, reducing duplicate code by 35% and accelerating frontend development.
- Integrated **REST APIs** and streamlined frontend data flow, reducing redundant API interactions by 20% while improving application responsiveness.
- Implemented **WCAG 2.1** accessibility standards using semantic HTML, ARIA attributes, keyboard navigation, and screen-reader support, improving accessibility compliance across enterprise recruitment workflows.
- Enhanced React application performance through component rendering improvements, efficient state management, and UI optimization, reducing page rendering time by 20%.
- Maintained seamless interoperability between legacy JSP/**JavaScript** applications and modern React modules, ensuring uninterrupted business continuity during phased modernization.
- Partnered with Product Owners, UX Designers, Backend Engineers, and QA teams throughout **Agile** development, contributing to code reviews, production releases, and enterprise software delivery.
- Integrated an **MCP (Model Context Protocol)** server with **Claude Code** into the development workflow, streamlining code generation, debugging, and review for faster, higher-quality delivery.

Application Developer: React.js Developer

01/2021 – 04/2025

IBM (Client: BMW Bank)

Bengaluru, India

- Built a high-performance **React.js** Single Page Application (SPA) using **React.js** and **React Router** v6.4+, improving navigation speed by 30% for BMW Bank's Internal Loan Management System.
- Engineered core business modules including **JWT Authentication**, Loan Application Management (**CRUD**), Dashboard, Application Tracker, EMI Calculator, Financial Statistics, Admin Approval Interface, and User Profile Management, improving feature delivery efficiency by 25%.
- Architected scalable application state using **Redux Toolkit** and **Context API**, improving dashboard responsiveness by 25% while simplifying application-wide data flow.
- Integrated **REST APIs** and **GraphQL**, improving data retrieval efficiency by 20% and enabling reliable communication across enterprise services.
- Accelerated frontend performance using lazy loading, code splitting, React Hooks optimization, asset compression, and request optimization, reducing initial page load time by 20%.
- Crafted reusable, responsive, and accessible UI components using **Material-UI**, **Styled Components**, **HTML5**, and **CSS3**, increasing mobile user engagement by 35% and improving UI consistency.
- Strengthened application security by implementing **JWT Authentication** and Role-Based Access Control (**RBAC**), eliminating unauthorized access through fine-grained permission handling.
- Collaborated with backend engineers, QA teams, and business stakeholders to define API contracts, resolve production issues, participate in code reviews, and deliver enterprise-grade software through **Agile** methodologies.

SKILLS

Core Frontend: React.js, React 18, JavaScript (ES6+), TypeScript, HTML5, CSS3, React Router, Redux Toolkit, Context API, GraphQL, Material-UI (MUI), Styled Components, Sass/SCSS, Responsive Web Design, SAP UI5 Web Components, Fiori Design System, Accessibility (WCAG 2.1)

AI Tools & AI-Assisted Development: GitHub Copilot, Cursor, Claude Code, MCP (Model Context Protocol) Server integration, AI-assisted code generation & review, prompt-driven debugging and refactoring workflows

Testing & Dev Tools: React Testing Library, Jest, ESLint, Prettier, Git, GitHub, Jenkins

Performance & Architecture: Component-Based Architecture, Reusable UI Components, State Management, Lazy Loading, Code Splitting, Memoization, Performance Optimization

Additional: Node.js (Basic), Express.js (Basic), MongoDB (Basic), Agile/Scrum

EDUCATION

B.E. Electronics & Communications, Chandigarh University

Chandigarh, India

08/2016 – 09/2020
